Exp 24:Write a Prolog Program to suggest Dieting System based on Disease.

Code:

```
diet(diabetes, low_sugar_food).
diet(obesity, low_calorie_food).
diet(blood_pressure, low_salt_food).
diet(anemia, iron_rich_food).
diet(fever, fruits_and_fluids).

suggest_diet(Disease, Food) :-
  diet(Disease, Food).
```

Output:
