Exp 22:Write a Prolog Program to print particular bird can fly or not. Incorporate required queries.

Code:

```
bird(parrot).
bird(pigeon).
bird(sparrow).
bird(crow).
bird(penguin).
bird(ostrich).

cannot_fly(penguin).
cannot_fly(ostrich).

can_fly(X) :-
   bird(X),
  \+ cannot_fly(X).
```

Output:
